Plates Infused With Real Diamond Dust

Black Diamond is bound to become your best friend forever. Along with diamond dust, the plates also consist of ceramic and tourmaline which emit copious amounts of negative ions to give maximum shine and seal the cuticles to promote healthier hair. Did we mention it's made out of DuPont plastic? You won't believe how lightweight it is; it won't strain your wrists and you will be able to style all day! With its irresistible features like: dual voltage for international use, 9ft swivel cord, digital read out, and a body frame made from DuPont plastic, the Black Diamond will be your go to tool.

Black Onyx

The ultimate styling tool to give the most lustrous shine and sleekness you will ever see. Our Black Onyx's plates have been wrapped in real onyx stone and include a turbo trigger that releases an extra 10°F of heat so there is virtually no loss of heat during the styling process. Our high-end technologies meet the healing properties of onyx gemstone and create the perfect "style therapy".
